E. Teacher Education Information	II-E

I.A. PURPOSE OF THE COMMON PREREQUISITES MANUAL

In 1996, institutions of higher education in the state of Florida, under legislative mandate and through the direction of the Articulation Coordinating Committee, established a list of common prerequisite courses for every degree program. The purpose of such a list is to provide students, especially those who plan to transfer between institutions, with information regarding the courses that they will need to take to be admitted into upper division programs. The Common Prerequisites Counseling Manual is a centralized compilation of program prerequisites that can be referenced by counselors and students in their academic planning. The Common Prerequisites Counseling Manual is compiled in a format as established by the Oversight Subcommittee of the Articulation Coordinating Committee and is considered to be the “official” publication of the program prerequisites. It is compiled annually and placed in a format that is accessible by all institutions. The Common Prerequisites Manual is not intended as a comprehensive advising manual. For effective academic planning, students should be referred to university catalogs and counseling manuals.

Common Prerequisites and substitutions are for all public Florida institutions and apply to all students (native and transfer). Common Prerequisites are required components of the degree programs within the State University System. Common Prerequisites must be the same at all institutions in order to facilitate efficient transfer among all 38 public Florida postsecondary institutions, except for specific program tracks and program exceptions approved by the Oversight Committee (OSC) and the Articulation Coordinating Committee. The Division of Colleges and Universities has approved exceptions to the standardized prerequisites for programs with different focuses or different structures of a similar major. For example, the Environmental Studies concentration within Liberal Studies at Florida Gulf Coast University requires different prerequisite courses than the Environmental Science program at Florida International University. The various programs, concentrations, and tracks with corresponding prerequisites are noted in the Common Prerequisites Manual.

Each program of study listed in the Common Prerequisite Manual provides information regarding the required and/or suggested common prerequisites for that program. Some programs do not require common prerequisite courses. Others may have additional requirements for acceptance into that program such as Grade Point Average or grades on specified courses. Students are advised to consult university catalogs, counseling manuals, and advisors at the receiving institution to ensure accurate academic planning.

Students should know that occasionally a common prerequisite requirement has course prerequisites. With qualifying placement test scores, a student may be able to move directly into that common prerequisite without having to take the course prerequisite. It should be noted that some students may need to take one or all of the course prerequisites before moving into the common prerequisite listed. In this instance, credit hours will be added to the total A.A. Degree program.

Only course substitutions approved by the OSC can be utilized. Universities and community colleges cannot grant unapproved course substitutions for either native students or transfers from Florida public institutions. Further, all institutions must accept the common prerequisites and/or substitutions in transfer. All recommendations for the addition or deletion of a course designated as a common prerequisite and the addition or deletion of course substitutions must come through the Oversight Committee with the Articulation Coordinating Committee giving final approval.

Discipline committees made up of faculty from a variety of public institutions across the state meet annually to develop and review the common prerequisites for their academic programs. Academic departments in all Florida public higher education institutions are expected to abide by the program prerequisites as determined by those discipline committees and approved by the Articulation Coordinating Committee for placement into the Common Prerequisites Counseling Manual.

I.B. CATALOG YEAR IN EFFECT

The initial effective date of the Common Prerequisites Counseling Manual was Fall Semester 1996. Students enrolled prior to Fall 1996 shall come under the catalog year in effect at the time of their matriculation or have the option of coming in under the new catalog. Each subsequent Common Prerequisites Counseling Manual will be effective with the following Fall Term. Students who matriculate in 1999 will come in under the 1999-2000 Common Prerequisites Manual; students who matriculate in 2000 will be under the 2000-2001 Manual, etc.

Transfer students: Students who transfer from one public institution to another in the State University and Community College Systems within two (2) years of their matriculation and seek admittance to the upper division will be assessed under the common prerequisite requirements of their entering catalog. For example, a student who enters a Florida community college in Fall 1999 and seeks admittance to an upper division major for Fall 2001 must meet the major common prerequisites listed in the 1999-2000 Common Prerequisites Manual. **However, if the student does not seek admittance within two years of his or her matriculation, he or she will come under the manual dated two years prior to transfer.** For example, if the student enters in Fall 1999, but does not transfer until Fall 2005, he or she must meet the requirements of the 2003-2004 Manual.

I.C. DEFINITIONS OF COMMON PREREQUISITES, SUBSTITUTIONS, AND SUGGESTED COURSES

The State of Florida has identified Common Prerequisites for all university programs. Contained within this Counseling Manual are the Common Prerequisites or their substitutions, which must be completed by all students going into that field of study and which must be accepted by all state universities and applied toward the degree. Common Prerequisites must be approved by the Articulating Coordinating Committee. A course or its substitute cannot be identified by a university or a community college as a prerequisite unless it is approved by the Articulation Coordinating Committee. In cases where numerous course substitutes cannot be listed, a notation has been made to alert the reader. Counselors should check with the institution for course substitutes. In all cases, the receiving institution must accept the common prerequisite or substitution in transfer.

When a note indicates an “equivalent” course will substitute for a common prerequisite, the eligible course will be determined by the Florida public community college or university where the student is currently earning the Associate in Arts or Baccalaureate degree.

Institutions may approve as a substitution for a common prerequisite program (CCP) course a comparable course which contains an advanced treatment of the material required in the CCP course. Determination that the course is more advanced will be made by the department offering the course at the receiving institution.

Upper division courses may substitute for common prerequisites and will be accepted in transfer. The eligible upper division course substitution will be determined by the institution where the student is enrolled for his/her upper division coursework and should contain all the components of the lower level common prerequisite plus increased depth and breadth of the subject matter.

Florida Statute 1007.25 (9) states that,

“a student who received an associate in arts degree for successfully completing 60 semester credit hours may continue to earn additional credits at a community college. The university must provide credit toward the student’s baccalaureate degree for an additional community college course if, according to the statewide course numbering, the community college course is a course listed in the university catalog as required for the degree or as prerequisite to a course required for the degree.”

Note: Lower level institution-specific courses required for a degree, which can be accommodated in the junior and senior years without exceeding the specified number of credit hours for the degree, may be specified in university counseling manuals. These courses, which may be taken in the freshman and sophomore years, are not to be considered common prerequisites, cannot be required for admission, need not be approved by the Articulation Coordinating Committee, and may vary from university to university.

I.D. CODING IN UNIVERSITY COUNSELING MANUALS/CATALOGS

THERE ARE TWO CODES WHICH UNIVERSITIES MAY ASSIGN TO THE COMMON PREREQUISITES IN THEIR UNIVERSITY COUNSELING MANUALS.

For purposes of conveying consistent information through the Common Prerequisites Manual and the university counseling manuals, the following codes have been developed. The codes define the types of courses that students would need to take in the lower division for an associate in arts or baccalaureate degree:

P: Prerequisites that are required for admission in the university upper division program and must be completed by the student at either the community college or state university prior to being admitted to the program. Students may be admitted into the university without completing the prerequisites, but may not be admitted into the program. In some cases, students may be denied admission to the institution if they have not met the prerequisites for the program.

***P:** Prerequisites that are lower-level courses required for preparation for the university major and must be taken at a community college or university lower division program prior to a student receiving the baccalaureate degree from a university. It is preferred that these prerequisites be completed in the freshman and sophomore years. However, they are not required for admission into the specified program and students may not be denied admission to a program due to their deficiency

I.E. GENERAL EDUCATION COURSES

Courses which satisfy the General Education Requirements vary from institution to institution, although all adhere to 36 credit hours.

At some community colleges, a course satisfying General Education Requirements may fulfill more than one category area. For instance, ENL X010 may meet the General Education Requirement for Communications OR Humanities. In such a case, the student may not use the course to fulfill the two areas simultaneously. The student must choose either Communications or Humanities. However, the same course may be used to fulfill a common prerequisite and one of those General Education areas.

I.F. COURSE NUMBERING

Specific to this document, the letter “X” has been used to indicate the following situations:

- Any **level** course acceptable. Example: MAC X013
This means MAC 1013, or 2013, or 3013, or 4013.
- **Any** course acceptable. Example: CHM XXXX
This means any course with the prefix of CHM such as CHM 1045 or CHM 1046, etc. May be accompanied by an explanation.
- **Numerous** course(s) with various prefixes and numbers. Example: XXX XXXX
These courses are always accompanied with an explanation. For instance, this designation may be for foreign language, where prefixes/numbers may be Spanish, Latin, French, German, etc.

Important: The eligible course(s) will be determined by the institution in which the student is enrolled for his/her lower-level coursework and will be accepted in transfer at any other institution as meeting the common prerequisite requirement. If the receiving institution has a preferred course, and requires the student to take its course, that course is not to be regarded as a common prerequisite, cannot be required for admission, and must be accommodated in the junior and senior years without exceeding the specified number of credit hours for the degree.

In some instances, courses and labs appear to be listed incorrectly, when, in fact, the combination listed is correct. Such an example is in CIP 15.1001 Track B where PHY X053 is coupled with the lab PHY X048L.

I.G. INSTITUTION ACRONYMS

Acronym	Full Name
BC	Broward College
CC	Chipola College
CCF	College of Central Florida
DSC	Daytona State College
EFSC	Eastern Florida State College
FAMU	Florida Agricultural and Mechanical University
FAU	Florida Atlantic University
FGC	Florida Gateway College
FGCU	Florida Gulf Coast University
FIU	Florida International University
FSCJ	Florida State College at Jacksonville
FSU	Florida State University
FSWSC	Florida Southwestern State College
GCSC	Gulf Coast State College
IRSC	Indian River State College
LSSC	Lake-Sumter State College
MDC	Miami Dade College
NCF	New College of Florida
NWFSC	Northwest Florida State College
PBSC	Palm Beach State College
PESC	Pensacola State College
PHSC	Pasco-Hernando State College
POLY	Florida Polytechnic University
PSC	Polk State College
SCFMS	State College of Florida, Manatee-Sarasota
SFC	Santa Fe College
SFSC	South Florida State College
SJRSC	St. Johns River State College
SPC	St. Petersburg College
SSCF	Seminole State College of Florida
TCC	Tallahassee Community College
UCF	University of Central Florida
UF	University of Florida
UNF	University of North Florida
USF	University of South Florida
USFSM	University of South Florida Sarasota-Manatee
USFSP	University of South Florida St. Petersburg
UWF	University of West Florida
VC	Valencia College

I.H. MAKING REVISIONS TO THE COMMON PREREQUISITES

Proposed changes to any common prerequisites established by the Articulation Coordinating Committee shall be submitted in writing to the Chair of the Articulation Coordinating Committee. Proposed changes would include the addition or deletion of a course designated as a common prerequisite and the addition or deletion of course substitutions. The proposed amendments should be submitted by the first week in February of each year prior to the subsequent Fall semester implementation. See the timeline provided below for a detailed explanation of the revision process. All recommendations shall come through the Oversight Committee with the Articulation Coordinating Committee giving final approval. Final approval of the amendments shall be made by the Articulation Coordinating Committee at its September meeting. The amendments shall be incorporated into the Common Prerequisite Counseling Manual for distribution in December for inclusion in university and community college catalogs to be distributed in May and June.

REVISIONS TIMELINE

November-January 31	Colleges submit requests for revisions to DCU/CC staff
Early February - First Week	DCU/CC staff send requests for revisions to Faculty Discipline Co-Chairs
Early March - First Week	Co-Chairs send requests out to respective Committees (Committees may meet once each year face-to-face)
Mid-April	Co-Chairs submit Faculty Discipline Committees' recommendations for revisions to Division of Colleges and Universities and Community College staff
June	Staff compiles recommendations from Faculty Discipline Committees and sends to Co-Chairs for verification
Early August	Oversight Committee Meeting held to approve recommendations for revisions
September	Articulation Coordinating Committee approves changes
October-November	Common Prerequisite Manual revisions made and updated Manual finalized
December	Manual distributed to community colleges and universities
<i>[November-January]</i>	<i>Revisions submitted again for the next edition of the Manual</i>
December-May	Universities and community colleges prepare institutional catalogs
May	SUS and CC catalogs published with revised common prerequisites
Fall	New changes become effective

Common Prerequisite 2019 - 2020 Summary

June 2019

52.0901 Track 2	Hospitality Admin/Mgt	FGCU (Project)	Moved track
52.0906	Resort & Hospitality Mgt	FGCU (Project)	CIP eliminated.

I. I. HOW TO READ AND INTERPRET THE COMMON PROGRAM PREREQUISITES FOR DEGREE PROGRAMS

Program prerequisites are primarily displayed as groups of courses. A group contains one or more courses. If there is more than one course in a group, the group defines relationships among the courses. If all the courses in a group are required, then the group is an AND group. If only one of the courses in a group is required, then the group is an OR group.

Vertical and horizontal lines, indentations, and special symbols identify group types and relationships. AND groups are represented by the ampersand (&) symbol next to each course on the same vertical line. OR groups are represented by the “or” symbol next to each course on the same vertical line. However, the first course within a group shows a horizontal line instead of the “&” or “or” symbol. Indentations represent groups within groups. Groups within groups are referred to as nested groups.

All program prerequisites include at least one group, called the outer group. If the program allows the student to choose among several courses, then additional groups are used. The additional groups are contained (or nested) within the outer group. Any additional groups may include nested groups.

The format also lists credit hours for the courses. Any relevant course notes are displayed at the bottom of the course listing.

To satisfy the prerequisites for the Accounting degree program below, a student must take 7 or 8 total courses as follows:

1. ACGX021 OR both ACGX001 AND ACGX011
2. ACGX071
3. CGSX100
4. ECOX013
5. ECOX023
6. MACX233
7. STAX023 OR QMBX100

In the Accounting program example below, the outer group is an AND group and includes five courses and two nested OR groups. The first nested group includes one course and one nested AND group. The second nested group includes two courses. Four of the courses listed have additional notes.

Program: Accounting

CIP: 52.0301

Offered At: FAMU, FAU, FGCU, FIU, FSU*, UCF, UF*, UNF, USF*, UWF

Track: 1

Program Length: 120 Cr. Hrs.

LOWER LEVEL COURSES

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

- (1) At FSU and USF, ACGX071 will count toward the degree as elective credits for transfer students. However, it is recommended that native students take another non-accounting elective.
 - (2) or demonstrated competency. At FAMU, MANX543 is an acceptable substitute for CGSX100.
 - (3) At UCF, ECOX401 is an acceptable substitute for STAX023 and MACX233.
- * Limited Access.

Program: Actuarial Science **CIP:** 52.1304
Track: 1
Offered At: FSU, UCF **Program Length:** 120 Cr. Hrs.

REVISED 10/22/08
 The UCF program is inactive at this time.
 REVISED 10/28/2009

For Polk State College's program, an AS in Professional Pilot Science is required for the professional pilot track, or students may enter with any associate degree as long as they have the FAA pilot ratings that are earned in the professional pilot degree. Those ratings are: US FAA Private Pilot (Single Engine Land), Instrument Rating (Single Engine or Multi-Engine track), and Commercial Pilot (Single Engine or Multi-Engine). For the Aerospace Administration concentration, students with an associate degree in any area can be accommodated.

LOWER LEVEL COURSES

There are no specified common prerequisites for this major. All Florida College System students are encouraged to complete the Associate degree. Students should consult with an academic advisor in their major degree area at the intended transfer institution.

The following is language approved by those colleges with BAS degree programs:

Admission to Bachelor of Applied Science (B.A.S.) degree programs usually requires an Associate in Science (A.S.) or Associate in Applied Science (A.A.S.) degree in a related area. If a student has earned an Associate in Arts (A.A.) degree, or an A.S. degree, an A.A.S. degree, or its equivalent in an unrelated area, the student may be admitted on a case-by-case basis with approval of the appropriate academic administrator. Some majors may have licensure or other types of requirements prior to admittance. Due to the variance in specialized B.A.S. degree programs and concentrations, students are strongly encouraged to consult with an academic advisor at the B.A.S degree-granting institution.

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

- (1) Introductory programming in Ada, C, C++, Pascal or equivalent language

Program: Biological & Physical Sciences Interdisciplinary
 Studies
 Computer Science and Mathematics
Offered At: UWF

CIP: 30.0101
Track: 11/16
Program Length: 120 Cr. Hrs.

(UWF Tracks 1-15, USF Track 16)

REVISED 5/27/09

(Please see notes in the following page)

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

- (1) Music program national accreditation requires minimum semesters of exposure in specified coursework.
- (2) DEFINITIONS:
MVxXX1X and MVxXX2X are defined as courses under one of the specified prefixes that constantly maintain the digit 1 or 2 (depending upon which course) while allowing 0-9 to replace each "X." The prefix varies depending upon the student's focus (i.e., Brass, Strings, Woodwinds, etc.) Prefix areas to choose from are MVB, MVH, MVJ, MVK, MVO, MVP, MVS, MVV, and MVW. Two examples of possible courses are MVB1011 or MVP1311. Examples for MVxXX2X are MVW2223 and MVK2222.
- (3) Or Secondary Piano Proficiency by examination.

(Continues from previous page)

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

- (1) Intro Programming in C, C++, JAVA, or equivalent language. Choose programming language required by the university to which the student wishes to transfer.
 - (2) Science course for science majors.
 - (3) The BSCX010/BSCX011/CHMX045C option is only available to FSU students seeking a BS in Computer Science. FSU students following this sequence who choose to complete both BSCX010L and BSCX011L will satisfy the 'Science for Science Majors' requirement. FGCU students must take one of the physics sequences.
 - (4) MACX140 is only a common prerequisite for the FSU BA program. All other FSU students are not required to take this course.
Universities may have individual specific grade requirements for each prerequisite course. Consult the program for details.
- * Limited Access.

Cr. Hrs.

— Take one or both courses as needed for the degree and major(s):

or-	CHIX220	3
or-	JPNX220	3

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

- (1) Must demonstrate proficiency by testing or completion of a foreign language through the intermediate level. Which language depends upon the track/focus of the student. At FSU, the intermediate level would be either CHIX220 or JPNX220. Depending upon where a student begins in his or her language skills will determine if any courses need to be taken prior to the one listed above. See Institution for details.

NOTE: Native or heritage speakers or other persons with experience in a foreign language may qualify for a higher level language course, or exempt course(s) entirely. Please see the university to ensure proper advising and placement.

-
- (1) Courses are offered in summer session C to accommodate transfer students who enroll in the university and our major in the summer. Thus, when fall semester begins, these students can enroll in the other required courses for which these courses are prerequisites. Students who enroll in the fall can take these courses and those required as part of the 'area of concentration' during the semester. Following this, there is ample time to complete the remaining 120 credit hours.

Offered At:	<u>UF</u>	Program Length:	<u>120 Cr. Hrs.</u>

REVISED 5/27/09

Technical Change 4/16/2019

LOWER LEVEL COURSES

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

The Fire and Emergency Services baccalaureate degree is designed to build on the student's experience in the fire [FES] service and to add the academic substance to prepare graduates to lead public or private sector fire and emergency service units. Students must have a basic understanding of FES and are required to have experience in a fire, EMS, or emergency management agency. Appropriate FES certifications are also necessary for admission.

There are no specified common prerequisites for this major. All Florida College System students are encouraged to complete the Associate degree. Students should consult with an academic advisor in their major degree area at the intended transfer institution.

— Please see the note below:

Admission to Bachelor of Applied Science (BAS) degree programs usually requires an Associate in Science (AS) or Associate in Applied Science (AAS) degree in related area. If a student has earned an Associate in Arts (AA) degree, or an AS degree, an AAS degree or its equivalent in an unrelated area, the student may be admitted on a case-by-case basis with approval of the appropriate academic administrator. Some majors may have licensure or other types of requirements prior to admittance. Due to the variance in specialized BAS degree programs and concentrations, students are strongly encouraged to consult with an academic advisor at the BAS degree-granting institution.

FOR ALL MAJORS: Students are strongly encouraged to select lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Consult with an academic advisor in your degree area.

REVISED 10/28/09

Technical revision 7/18/2018

LOWER LEVEL COURSES

The New College Registrar's Office evaluates transfer credit on behalf of the new College Faculty. Arts and sciences courses completed with a grade of 'C' or above, and consistent with New College's transfer credit policy (<http://www.ncf.edu/campus-directory/academic-offices/registrar/policies--procedures/transfer-credit-policy>) will be accepted for transfer and applied toward completion of semesters required for graduation. Pre-professional or vocational courses are not usually transferable.

New College grants transfer credit only for coursework done at an accredited postsecondary degree-granting college or university. New College graduation requirements are defined in terms of contracts (7 required), Independent Study Projects (ISPs) (3 required), and thesis or senior project completed, rather than in credit hours. Transfer credits for contracts and ISPs are calculated from courses transferred corresponding to the information below:

Number of Semester Credit Hours Accepted for Transfer : Contracts and ISPs Credited Toward New College Graduation

Fewer than 16 : None

16-19 : 1 Contract

20-35 : 1 Contract and 1 ISP

36-51 : 2 Contracts and 1 ISP

52 or more : 3 Contracts and 1 ISP

Credit by examination or credit earned as part of a special secondary school program or degree are applied to Liberal Arts Curriculum (General Education) requirements, following the Articulation Coordinating Committee's Credit-by-Examination Equivalencies.

Every New College student must complete at least 4 semester contracts and 2 Independent Study Projects in residence at New College in order to graduate.

Faculty advisers review the transfer student's previous work. Additional courses needed to graduate are based on New College area of concentration guidelines and a plan of study developed by the student and his/her professor.

LOWER LEVEL COURSES

The Wilkes Honors College is a liberal arts and sciences College on Florida Atlantic University's northern campus in Jupiter, Florida. Students Receive a Bachelor of Arts degree in Liberal Arts and Sciences, with a concentration, all Honors College students write an honors thesis. To help prepare for the senior thesis, transfer students are advised to take writing intensive classes at the Florida College System institution. Transfer students are also advised to complete their Associate of Arts degree, which automatically satisfies the Honors College Core requirements.

Upon admittance to the Honors College with an A.A. degree, transfer students will begin coursework in their selected concentration and complete other graduation requirements. These graduation requirements include: two distribution electives, which may be any course from any two distinct disciplines, one within the social sciences and one within the humanities; two courses in a foreign language; one course in international studies and one course in environmental studies; a weekly one-credit seminar called the Honors Forum, at which students meet faculty and other leading scholars and artists who present their work and introduce the leading ideas and controversies in their areas of expertise; the senior honors thesis; and three Critical Inquiry Seminars. These seminars are specially designed one or three-credit team-taught courses that engage in interdisciplinary inquiry. The aim of these team-taught courses is to explore problems from a variety of perspectives and to reflect on the connections and shared concerns of scholars from distinct disciplines. The Distribution requirements may be satisfied by suitable courses transfer students have already taken. A current list of courses that satisfy these requirements is available online at <http://www.fau.edu/divdept/honcol/core-courses.pdf>. The distribution electives requirement can be met by any course in the arts/humanities and any course in the social science not used to satisfy other degree requirements.

Transfer students must take at least 45 credits of upper level coursework while at the Honors College and should carefully plan their course selection at the Honors College accordingly.

* Limited Access.

FOR ALL MAJORS: Students are strongly encouraged to select lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Consult with an academic advisor in your major degree area.

- (1) Or a computer programming course in C or C++
- (2) The Bachelor of Information Engineering Technology (B.I.E.T.) program is designed to articulate with Associate in Science (A.S.) degree programs at Florida College System institutions in areas such as Computer Programming and Analysis, network Services Technology, and Computer Science (Networks or Programming). Specific local articulation agreements are being developed with Indian River State College, Broward College, and Miami-Dade College. Students transferring from a Florida College System institution should normally have completed an articulated A.S. program. Students who have completed at least 60 lower--division credits toward an A.S. degree program will be admitted but must complete the A.S. program in order to receive the B.I.E.T. degree. Students with at least 60 credits toward an A.A. degree may be admitted to the program but are subject to additional requirements.

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

- (1) Introductory Programming in C, C++, JAVA, or equivalent language.
Universities may have individual specific grade requirements for each prerequisite course. Consult the program for details.

Admission to Bachelor of Applied Science (B.A.S.) degree programs usually requires an Associate in Science (A.S.) or Associate in Applied Science (A.A.S.) degree in a related area. If a student has earned an Associate in Arts (A.A.) degree, or an A.S. degree, an A.A.S. degree, or its equivalent in an unrelated area, the student may be admitted on a case-by-case basis with approval of the appropriate academic administrator. Some majors may have licensure or other types of requirements prior to admittance. Due to the variance in specialized B.A.S. degree programs and concentrations, students are strongly encouraged to consult with an academic advisor at the B.A.S degree-granting institution.

 - (5) Pre-Calculus Course or Discrete Math. FIU requires both pre-calculus AND discrete math.
 - (6) Any General Ethics Course

Note #1: UWF - This track includes UWF's institution tracks for: Computer Technology, e-Learning Support Systems, and Web-Development Technologies.

Note #2: FIU - Consult FIU Catalog for double majors coupled with IT Programs. Students would need to take the prerequisites for the other major they select, in addition to the IT Prerequisites.

Universities may have individual specific grade requirements for each prerequisite course. Consult the program for details.

Note #3: USF - USF Tampa is the only USF System institution for this particular track.

- (7) Not required at FIU.

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

NOTE: Applicants who have accumulated 60 credit hours of college-level course work and meet admissions criteria will need to complete common prerequisites. Generally, transfer students with an A.A. degree or students from other universities are considered for provisional admission. These students may be required to complete as many as four semesters at the university to complete the pre-professional design requirements because of the sequential nature of the courses. Students should apply to the Summer A term of UF to begin the required sequence of design courses.

* Limited Access.

LOWER LEVEL COURSES

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

NOTE: Admission to Bachelor of Applied Science (B.A.S.) degree programs usually require an Associate in Science (A.S.) or Associate in Applied Science (A.A.S.) degree in a related area. If a student has earned an Associate in Arts (A.A.) degree or an A.S. degree, and A.A.S. degree, or its equivalent in an unrelated area, the student may be admitted on a case-by-case basis with approval of the appropriate academic administrator. Some majors may have licensure or other types of requirements prior to admittance. Due to the variance in specialized B.A.S. degree programs and concentrations, students are strongly encouraged to consult with an academic advisor at the B.A.S. degree-granting institution.

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

- (1) FSU and SFC do not require this course. There are no common prerequisites to the FSU program

Admission to Bachelor of Applied Science (B.A.S.) degree programs usually requires an Associate in Science (A.S.) or Associate in Applied Science (A.A.S.) degree in a related area. If a student has earned an Associate in Arts (A.A.) degree, or an A.S. degree, an A.A.S. degree, or its equivalent in an unrelated area, the student may be admitted on a case-by-case basis with approval of the appropriate academic administrator. Some majors may have licensure or other types of requirements prior to admittance. Due to the variance in specialized B.A.S. degree programs and concentrations, students are strongly encouraged to consult with an academic advisor at the B.A.S degree-granting institution.

* Limited Access.

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

- (1) Music program national accreditation requires minimum semesters of exposure in specified coursework.
 - (2) DEFINITIONS:
MVxXX1X and MVxXX2X are defined as courses under one of the specified prefixes that constantly maintain the digit 1 or 2 (depending upon which course) while allowing 0-9 to replace each "X." The prefix varies depending upon the student's focus (i.e., Brass, Strings, Woodwinds, etc.) Prefix areas to choose from are MVB, MVH, MVJ, MVK, MVO, MVP, MVS, MVV, and MVW. Two examples of possible courses are MVB1011 or MVP1311. Examples for MVxXX2X are MVW2223 and MVK2222.
 - (3) Or Secondary Piano Proficiency by examination.
- * Limited Access.

(Please see notes in the following page)

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

- (1) Music program national accreditation requires minimum semesters of exposure in specified coursework.
 - (2) DEFINITIONS:
MVxXX1X and MVxXX2X are defined as courses under one of the specified prefixes that constantly maintain the digit 1 or 2 (depending upon which course) while allowing 0-9 to replace each "X." The prefix varies depending upon the student's focus (i.e., Brass, Strings, Woodwinds, etc.) Prefix areas to choose from are MVB, MVH, MVJ, MVK, MVO, MVP, MVS, MVV, and MVW. Two examples of possible courses are MVB1011 or MVP1311. Examples for MVxXX2X are MVW2223 and MVK2222.
 - (3) Or Secondary Piano Proficiency by examination.
- * Limited Access.

-
- (1) Not required for SPC BSN program; Passing score on NCLEX exam demonstrates competency in the content area. NOTE: Graduation from an A.S. program and active RN licensure is required for admission.
 Notice to A.S. to B.S.N. Nursing Students: Some colleges and universities may require all general education courses, including the above common prerequisites, to be completed BEFORE application. Some may require all general education courses completed by the time a certain number of nursing courses are completed (before any 4000 level courses are attempted or before the final nursing course) or graduation. See the individual institution for details.
 Note: Student enrollment in the SJRSC program is planned to begin in fall 2013.
- (2) Not required for FSWSC BSN program; Passing score on NCLEX-RN exam demonstrates competency in the content area. NOTE: Graduation from an A.S. program and active RN licensure is required for admission.
- (3) Not required for FGC BSN program.

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

 Admission to Bachelor of Applied Science (B.A.S.) degree programs usually requires an Associate in Science (A.S.) or Associate in Applied Science (A.A.S.) degree in a related area. If a student has earned an Associate in Arts (A.A.) degree, or an A.S. degree, an A.A.S. degree, or its equivalent in an unrelated area, the student may be admitted on a case-by-case basis with approval of the appropriate academic administrator. Some majors may have licensure or other types of requirements prior to admittance. Due to the variance in specialized B.A.S. degree programs and concentrations, students are strongly encouraged to consult with an academic advisor at the B.A.S degree-granting institution.

- (1) Or any transferable college-level psychology.
- (2) Or any transferable college-level statistics.

NOTE: Admission into this program requires an A.S. degree in a related area or an A.A. degree.

Program:	<u>Paralegal Studies (BAS)</u>	CIP:	<u>22.0302</u>
		Track:	<u>2/2</u>
Offered At:	<u>SPC</u>	Program Length:	<u>120 Cr. Hrs.</u>

UCF and UWF offer a program in Legal Assisting under the same CIP, track 1. FGCU offers an AS to BS Capstone Program in Legal Studies. The prerequisite is an AS in Paralegal Studies or Legal Assisting from a Florida community college. See AS to BS Articulation Manual and university catalog.

- (1) Although this course is not a common prerequisite at UF, it is a graduation requirement.
 - (2) This course is not a common prerequisite for FAMU; however, it does count as a general education course at the institution.
Grade 'C' or higher is required for all common prerequisite courses.
- * Limited Access.

Program:	Public Safety Management (BAS) or Public Safety Administration (BAS) or Public Safety/Homeland Security	CIP:	43.9999
		Track:	1
Offered At:	FAU, FSCJ, FSWSC, MDC, SCFMS, SPC	Program Length:	120 Cr. Hrs.

REVISED 5/27/09
 REVISED 10/27/10
 Revised 9/1/2011
 Technical revision 7/5/2018

LOWER LEVEL COURSES

There are no specified common prerequisites for this major. All Florida College System students are encouraged to complete the Associate degree. Students should consult with an academic advisor in their major degree area at the intended transfer institution.

 Admission to Bachelor of Applied Science (B.A.S.) degree programs usually requires an Associate in Science (A.S.) or Associate in Applied Science (A.A.S.) degree in a related area. If a student has earned an Associate in Arts (A.A.) degree, or an A.S. degree, an A.A.S. degree, or its equivalent in an unrelated area, the student may be admitted on a case-by-case basis with approval of the appropriate academic administrator. Some majors may have licensure or other types of requirements prior to admittance. Due to the variance in specialized B.A.S. degree programs and concentrations, students are strongly encouraged to consult with an academic advisor at the B.A.S degree-granting institution.

- (1) Admission into this program requires students to have an A.S. in a public safety discipline (Corrections, Fire Science, Law Enforcement, Emergency Administration Management, Emergency Medical Technology). Students with an A.S. degree may be admitted with approval of the Dean and must complete 24 credits in a single public safety (A.S.) major.
- (2) The FAU degree program is a Bachelor of Public Safety Administration. It is not an AS to BS degree program, and a GPA of 2.0 is required for admission.

Program:	<u>Public Safety and Security</u>	CIP:	<u>43.0107</u>
		Track:	<u>1</u>
Offered At:	<u>FSU</u>	Program Length:	<u>120 Cr. Hrs.</u>

LOWER LEVEL COURSES

— SPNX220 ⁽¹⁾	Cr. Hrs.
	3

FOR ALL MAJORS: Students are strongly encouraged to select required lower division electives that will enhance their general education coursework and that will support their intended baccalaureate degree program. Students should consult with an academic advisor in their major degree area.

- (1) Must demonstrate proficiency in the language by testing or completion of the intermediate level. The intermediate level is SPNX220 or equivalent. Depending upon where a student begins in his or her language skills will determine if any courses need to be taken prior to the one listed above. See Institution for details.

NOTE: Native or heritage speakers or other persons with experience in a foreign language may qualify for a higher level language course, or exempt course(s) entirely. Please see the university to ensure proper advising and placement.

NOTE: Some institutions require a minimum grade in the language courses. Please check with the institution.

II.D. Common Prerequisites for Entry into Undergraduate Engineering Programs in the State University System of Florida

Tenets Governing the Transfer of Students from Community College to Universities

1. The attached list of 48 hours of prerequisite courses (hereafter referred to as "the 48 hours") constitute the common prerequisites for all undergraduate engineering programs in the State University System (SUS).
2. Students who complete the 48 hours of common prerequisites will be admitted to any engineering program in the SUS, provided they meet applicable limited access criteria (e.g. GPA, not additional courses) or minimum grade requirements.
3. The 48 hours represent the number of hours students can take at a community college and be assured that they will transfer and count toward the credit hour requirement for the baccalaureate in Engineering in the SUS. If students know which SUS program they wish to transfer into, and that particular program has additional non-engineering lower level courses required for the degree, the students can elect to remain at the community college and take those courses. The courses will be accepted in transfer.
4. If a student had to take additional mathematics courses prior to becoming eligible for the initial calculus course listed in the 48 hours, those courses will count toward the A.A. Degree, but will be over and above the prescribed number of hours for the bachelor's in engineering. Similarly, if a student takes foreign language courses at the community college to meet the SUS admissions requirement, those hours will count toward the A.A. but will be outside of the hours for the bachelor's in engineering. If a student takes the foreign language courses (required for admission) at the university instead of the community college, excess hour surcharges may apply.
5. In light of item 4 above, students are expected to routinely receive their A.A. degree prior to transferring to a state university. If students transfer prior to receiving the A.A. (i.e., less than 60 hours), a transcript of the courses they take at the senior institution, comprising the additional hours they need to meet the 60 hour requirement, will be transferred to the community college so that an A.A. degree is awarded by the community college to the student, provided the student has met all other requirements at the community college. If students complete their 36 hours of general education at the community college (as expected) and transfer prior to receiving the A.A., their general education units will be protected by the provisions of the articulation agreement.
6. Consistent with State Board of Education Rules, if a community college student takes a non-engineering course whose prefix and last three digits are identical to the prefix and last three digits of a course required in an SUS engineering program, that course will substitute for the SUS course.
7. Individual SUS universities may enter into articulation agreements with individual community colleges for required engineering courses that students may take beyond the 48 hours. No SUS institution may enter into local agreements that do not include all of the courses listed in the 48 hours. Such agreements may include the option of community college students dual enrolling or cross enrolling in upper division courses not available at the community college.

Community College Prerequisites for Entry into Engineering Programs in the State of Florida University System

Program of Study at the Community College

The following common engineering articulation courses should be completed at the community college (if available) as part of the Community College's General Education Program.

Communications:

ENC X101	English I	3 hours
ENC X102	English II	3 hours

Mathematics:

MAC X311*	Calculus I with Analytical Geometry	4 hours
MAC X312*	Calculus II with Analytical Geometry	4 hours
MAC X313*	Calculus III with Analytical Geometry	4 hours
MAP X302	Differential Equations	3 hours
(* or MAC X281, MAC X282, MACX283)		

Natural Sciences:

CHM X045**	General Chemistry I	3 hours
CHM X045L**	General Chemistry I laboratory	1 hour
PHY X048	Physics I	3 hours
PHY X048L	Physics I Laboratory	1 hour
PHY X049	Physics II	3 hours
PHY X049L	Physics II Laboratory	1 hour
(** or CHS X440 Chemistry for Engineers)		

Humanities & Social Sciences:

Humanities Courses	6 hours
Social Science Courses	6 hours
Humanities or Social Sciences	3 hours

All engineering programs at Florida public universities will accept and credit all 48 hours toward a bachelor of engineering degree for students who successfully complete the above listed prerequisites. Students are expected to routinely receive their A.A. degree prior to transferring to a state university. If students transfer prior to receiving the A.A. (i.e., less than 60 hours), the courses they take at the senior institution, comprising the additional hours they need to meet the 60 hour requirement, can be transferred to the community college so that an A.A. degree is awarded by the community college to the student and their general education requirements are protected.

Students should contact the specific engineering program office at the university of their choice for any additional information they need. In particular, guidance should be obtained in regard to course equivalencies or substitutions, additional courses from the community college which will transfer to the engineering program, and admittance to the engineering program.

II.E. TEACHER EDUCATION INFORMATION

[State Board of Education Rule 6A-5.066](#) that sets the requirements and approval process for state-approved educator preparation programs has been revised by the State Board. The revisions provide greater curriculum flexibility for teacher education programs to offer students innovative program structures and expanded alternatives to prepare greater numbers of teachers for Florida schools. In light of this rule revision, students who are planning to pursue an Education degree at the baccalaureate level are encouraged to seek assistance from an academic advisor to plan their program of study.

Associated CIP Codes For State-Approved Initial Teacher Education Programs

Candidates who complete a State Department of Education-approved teacher education program shall be eligible for the appropriate teaching certificate of the type and coverage for which the program has been approved provided they meet other requirements for teacher certification as specified in statutes or rules. Advisors are provided the following guidance for advising students concerning state-approved initial teacher education programs:

1. When a student enters one of the listed programs at a given university, that **student must work with a faculty advisor** to ensure that the courses chosen from general education options and the prerequisite menus cover all State-mandated teacher preparation competencies.
2. There are state-approved initial teacher education programs that are baccalaureate, integrated postbaccalaureate, integrated master's, master's programs, and specialist's programs. **Students within the baccalaureate programs must fulfill common prerequisites. Integrated postbaccalaureate and master's programs have the same prerequisites as baccalaureates.** Students in master's programs that receive their bachelor's degrees in the disciplines are strongly encouraged to take the education prerequisites.
3. When a student inquires about state-approved initial teacher education programs and appropriate corresponding prerequisites, the advisor should:
 - a. Check the chart below for the program and corresponding CIP for where the common prerequisites are listed for that program;
 - b. Check the Common Prerequisite Manual under the corresponding CIP for a listing of common prerequisites and institutions;
 - c. Verify the institutions' state-approval through accessing the following web link: <http://www.fldoe.org/profdev/teachprep/teachprep.asp>
