PROGRAMS OF WORK

PROGRAMS OF WORK

The Division of Career and Adult Education is responsible for developing educational programs that prepare individuals for the occupations that are important to Florida's economic development. Per F.S. §1004.92(2)(b)(4), each program is updated every three (3) years to reflect current business and industry needs specific to the occupation for which it prepares. With the help of educators, business and industry representatives, and trade associations, career and adult education programs are aligned with the skill requirements needed in today's workforce.

Click on one of the links below to access the program of work for a particular career cluster.
